## Welcome to PME 26

Welcome to PME 26! The School of Education and Professional Development at the University of East Anglia is delighted to be hosting the twenty-sixth annual meeting of the International Group for the Psychology of Mathematics Education. The theme for the conference this year is 'Learning from Learners' which, we are pleased to report, has captured the imagination of many of this year's contributors. In total we have in the region of 290 presentations, ranging from the psychology of mathematics in the very early years to discussions on advanced mathematical concepts. We will also be offering you a variety of entertainment that will restore your energy levels amid the demands of such a busy scientific programme.

We very much hope you enjoy your stay in Norwich and that you will feel welcome to return in years to come. The city dates back to Anglo-Saxon times and offers a wealth of sights, including a Norman castle (1067), two magnificent cathedrals (1096 and 1894) and what the eighteenth century historian, Francis Bloomfield, described as the 'grandest market in all England'. We recommend that you take the opportunity to wander around the city and discover its delights for yourself.

We hope that the conference will run smoothly with, apparently, very little effort on our part. If it doesn't, I can only reassure you that we have done, and will do, our very best! If it does all go well it will be due to many months of preparation and commitment from numerous people. We thank them all, especially members of the Local and Programme Committees. Particular attention must go to Gilah Leder for her encouragement in the early days of our work and to Rina Hershkowitz for continuing such support. Thanks too to Janet Ainley who proved to be an excellent Chair for the Programme Committee. The invaluable help of Lucila Recart and Bella Radford was also much appreciated. Angela Hook's and Claire Butler's hard work should not go unmentioned either. Joop van Dormolen's ceaseless labours in both creating and refining the computer programme we relied on and his endless patience and enthusiasm also deserve particular recognition. And finally, a special mention to Elena Nardi, without whom this venture would have been impossible.

More formally, we would like to thank the following sponsors:

- The Lord Mayor of Norwich for his most generous contribution on our arrival at the dinner dance;
- Jarrolds Department Store for heavily subsidising the Norwich guidebooks in your conference pack;
- Falmer Press for providing conference pens;
- Paul Chapman Publishers for donating conference notebooks;
- Colmans of Norwich for the savoury packs in your conference bag;
- The University of East Anglia for providing us with both time and space to host this conference.

Finally, should you have any questions/concerns during your stay, please do not hesitate to ask members of the conference team. We very much hope that you enjoy PME 26 and that you return home feeling refreshed and invigorated.

With very best wishes,

Anne Cockburn  
on behalf of the PME 26 Conference Committees

**Summer 2002**

## TABLE OF CONTENTS

### VOLUME 1

Welcome to PME26	1-iii
Table of Contents	1-v
<b>Introduction</b>	
The International Group for the Psychology of Mathematics Education	1-xxxv
Proceedings of previous PME conferences	1-xxxviii
The review process of PME26	1-xl
List of PME26 reviewers	1-xli
Index of presentations by research domains	1-xliv
List of authors	1-li
<b>Plenary Lectures</b>	
Ginsburg, Herbert P <i>Little children, big mathematics: learning and teaching in the pre-school</i>	1-003
Brown, Margaret <i>Researching primary numeracy</i>	1-015
Maher, Carolyn A <i>How students structure their own investigations and educate us: What we've learned from a 14 year study</i>	1-031
Noss, Richard <i>Mathematical epistemologies at work</i>	1-047
Verschaffel, Lieven <i>Taking the modeling perspective seriously at the elementary school level: Promises and pitfalls</i>	1-064

## Plenary Panel

- Learning from learners* 1-083  
Matos, João Filipe
- Episode 1: How Karin disturbed her teacher's line of reasoning* 1-084  
Van Dormolen, Joop
- Episode 2: Marco and Anna – Each following their own path* 1-091  
Zan, Rosetta
- Episode 3: Calculators – The first day* 1-098  
Groves, Susie

## Research Forums

### RF1 Abstraction: Theories about the emergence of knowledge structures

Coordinators: Dreyfus, Tommy & Gray, Eddie

- Dreyfus, Tommy & Gray, Eddie 1-113  
*Abstraction: Theories about the emergence of knowledge structures:  
Introductory remarks*
- Gray, Eddie & Tall, David 1-115  
*Abstraction as a natural process of mental compression*
- Schwarz, Baruch & Hershkowitz, Rina & Dreyfus, Tommy 1-120  
*Abstraction in context: Construction and consolidation of  
knowledge structures*
- Gravemeijer, Koeno 1-125  
*Building new mathematical reality, or how emergent modeling  
may foster abstraction*
- Sierpinska, Anna 1-129  
*Reaction*
- Boero, Paolo 1-133  
*Abstraction: What theory do we need in mathematics education?*

**RF2 *The nature of mathematics as viewed from mathematics education research***

Coordinators: English, Lyn D & Goldin, Gerald A

English, Lyn D & Goldin, Gerald A <i>The nature of mathematics as viewed from mathematics education research – introductory remarks</i>	1-141
Greer, Brian <i>Complexity of mathematics in the real world</i>	1-143
Sfard, Anna <i>Mathematics as a form of communication</i>	1-145
Edwards, Laurie D <i>The nature of mathematics: A personal journey</i>	1-149
Vinner, Shlomo <i>Boundaries, identities and mathematical objects – should we bother?</i>	1-153
Meissner, Hartwig <i>Einstellung, vorstellung, darstellung</i>	1-156
Goldin, Gerald A <i>Connecting understandings from mathematics and mathematics education research</i>	1-161
English, Lyn D <i>Concluding points</i>	1-166

**RF3 *Measuring mathematics learning and describing goals for systemic reform***

Coordinators: Sullivan, Peter & Siemon, Diane

Sullivan, Peter & Siemon, Diane <i>Measuring mathematics learning and describing goals for systemic reform – introductory remarks</i>	1-173
Lerman, Stephen <i>Measuring mathematics learning and describing goals for systemic reform: Some issues for consideration</i>	1-173

Brown, Margaret & Askew, Mike & Rhodes, Valerie & Denvir, Hazel Ranson, Esther & Wiliam, Dylan <i>Measuring progress in numeracy learning</i>	1-175
Clarke, Barbara & McDonough, Andrea & Sullivan, Peter <i>Measuring and describing learning: The early numeracy research project</i>	1-181
Mevarech, Zemira R <i>Large-scale studies in mathematics education: A search for identity</i>	1-186
van den Heuvel-Panheuzen, Marja <i>From core goals to learning-teaching trajectories as a guide for teaching primary school mathematics in The Netherlands</i>	1-191
Wright, Robert (Bob) & Gould, Peter <i>Using a learning framework to document students' progress in mathematics in a large school system</i>	1-197
 <b>RF4 <i>From number patterns to number theory: Issues in research and pedagogy</i></b>	
Coordinators: Zazkis, Rina & Campbell, Stephen R	
Zazkis, Rina & Campbell, Stephen R <i>Making a case for number theory</i>	1-205
Campbell, Stephen R <i>What is number theory?</i>	1-207
Zazkis, Rina & Liljedahl, Peter <i>Repeating patterns as a gateway</i>	1-212
Sinclair, Nathalie <i>For the beauty of number theory</i>	1-217
Mason, John <i>What makes an example exemplary?: Pedagogical and research issues in transitions from numbers to number theory</i>	1-223
Rowland, Tim <i>Proofs in number theory: History and heresy</i>	1-230

### **Discussion Groups**

- DG01 *Imagery and affect in mathematical learning* 1-239  
Coordinators: English, Lyn D & Goldin, Gerald
- DG02 *Stochastical thinking, learning and teaching* 1-240  
Coordinators: Greer, Brian & Reading, Christine
- DG03 *Semiotics in mathematics education research* 1-241  
Coordinators: Sáenz-Ludlow, Adalira & Presmeg, Norma
- DG04 *Researching the social and political in mathematics education from a critical perspective: Dilemmas for researchers* 1-242  
Coordinators: Hardy, Tansy & Povey, Hilary
- DG05 *Facilitating the conceptual change in mathematics* 1-243  
Coordinators: Pehkonen, Erkki & Merenluoto, Kaarina & Tzekaki, Marianna
- DG06 *Examining theses discussion group* 1-244  
Coordinators: Hart, Kathleen & Sullivan, Peter
- DG07 *Symbolic cognition in advanced mathematics* 1-245  
Coordinators: Hegedus, Stephen J & Tall, David & Eisenberg, Theodore
- DG08 *Learning disabilities in mathematics* 1-246  
Coordinators: Scherer, Petra & Moser Opitz, Elisabeth

### **Working Sessions**

- WS01 *The psychology of object construction* 1-249  
Coordinators: Mason, John & Watson, Anne
- WS02 *Learning from each other* 1-250  
Coordinators: Breen, Chris J. & Hannula, Markku
- WS03 *Composing trajectories* 1-251  
Coordinators: Nemirovsky, Ricardo & Barros, Apolinario
- WS04 *Gesture, metaphor and embodiment in mathematics* 1-252  
Coordinators: Edwards, Laurie & Bolite Frant, Janete & Draisma, Jan
- WS05 *Writing research papers for publication [with attention also to the review process]* 1-253  
Coordinators: Ainley, Janet & Jaworski, Barbara

### Short Oral Communications

- Abdul Rahman, Roselainy & Mason, John & Yusof, Yudariah Mohd 1-257  
*Changing engineering students attitudes to calculus*
- Alcock, Lara & Simpson, Adrian 1-258  
*The effectiveness of a question-based first course in analysis*
- Al-Ghafri, Mohammed & Jones, Keith & Hirst, Keith 1-259  
*Secondary trainee-teachers' knowledge of students' errors and difficulties in algebra*
- Alsaadi, Aziza 1-260  
*Comparing the classroom practice of teaching primary mathematics in England and Qatar*
- Alvarez, Jairo & Delgado, César 1-261  
*The Tall-Vinner problem. An operative reformulation*
- Barash, Aviva 1-262  
*Algorithmic mental models and metacognition*
- Benson, Carol 1-263  
*Instructional strategies and tasks developed in a teaching experiment on probability modeling*
- Berenson, Sarah 1-264  
*Lesson plan study and the growth of understanding of school mathematics among prospective high school teachers*
- Bershadsky, Irina & Shir, Karni & Zaslavsky, Orit 1-265  
*Looking at a square through another lens: A square as a locus*
- Borba, Rute & Nunes, Terezinha 1-266  
*Understanding number meanings and representations of directed numbers*
- Brinkmann, Astrid 1-267  
*Mathematical networks and their transformation in teaching and learning processes*
- Brown, Laurinda & Coles, Alf 1-268  
*It's not what you do, it's why you do it: Reflections on the role of teachers in research on algebra*

<u>Cavallaro, Maria Ines</u> & Anaya, Marta	1-269
<i>Cognitive problems of university students with the concept of distribution</i>	
<u>Chang, Ching-Kuch</u>	1-270
<i>Taiwanese inservice mathematics teachers' beliefs and values can change</i>	
<u>Chung, Jing</u> & Chu, Tien-Chen	1-271
<i>The affective domain and the achievement of the school children under two different mathematics instruction</i>	
<u>Da Rocha-Falcão, Jorge Tarcísio</u> & Leitão, Selma & Araújo, Cláudia Roberta & Lins Lessa, Mônica Maria & Oliveira Osório, Mônica	1-272
<i>Argumentation in the context of a didactic sequence in elementary algebra</i>	
<u>De Bock, Dirk</u> & van Dooren, Wim & Janssens, Dirk & Verschaffel, Lieven	1-273
<i>Broadening the scope of the illusion of linearity: A conceptual reanalysis of probabilistic misconceptions</i>	
<u>Delice, Ali</u>	1-274
<i>Recognising, recalling and doing in the 'simplification' of trigonometric expressions</i>	
<u>Fakir Mohammad, Razia</u>	1-275
<i>A co-learning partnership in teaching development: Practicality and limitations</i>	
<u>Gadanidis, George</u> & Hoogland, Cornelia & Hill, Bonilyn	1-276
<i>Mathematical romance: Elementary teachers' aesthetic online experiences</i>	
<u>Giraldo, Victor</u> & Carvalho, Luiz Mariano	1-277
<i>Local magnification and theoretical-computational conflicts</i>	
<u>Gono, Ebert N</u> & Hungwe, Godwin	1-278
<i>Mathematical language and pupils' performance</i>	
<u>González-Martín, Alejandro</u> & Camacho Machín, Matias	1-279
<i>Use of a competence model to describe students' understanding of concepts related to improper integration</i>	

<u>Gur, Hulya &amp; Çömlekođlu, Gözde &amp; Ersoy, Yasar</u> <i>Perceptions of a group of primary teacher trainees and mathematics teacher trainees on the use of calculators as a cognitive tool</i>	1-280
<u>Kabani-Potouridou, Elisabeth &amp; Koleza, Eugenia</u> <i>Imagery in geometrical problem solving</i>	1-281
<u>Kaufman Fainguelernt, Estela &amp; Cohen Gottlieb, Franca</u> <i>How the geometric constructions help the understanding of complex number?</i>	1-282
<u>Klein, Ronith &amp; Bassan-Cincinatus, Ronit &amp; Sheffet, Malka</u> <i>A teacher empowerment program - a model of teaching</i>	1-283
<u>Koyama, Masataka</u> <i>Research on the process of understanding concepts of triangle and quadrilateral in a classroom</i>	1-284
<u>Krupanandan, Daniel</u> <i>Problem solving the challenge facing South African mathematics teachers</i>	1-285
<u>Kwak, Jeeyi &amp; Reiss, Kristina M.</u> <i>Different views of Korean and German teachers beliefs about mathematics</i>	1-286
<u>Lam, Eva Tsz Wai</u> <i>Making and proving conjectures: Circles</i>	1-287
<u>Lann, Avital &amp; Falk, Ruma</u> <i>An average with unimaginate weights when the weights equal the values</i>	1-288
<u>Law, Huk-Yuen</u> <i>The use of student questioning for assessing mathematical understanding</i>	1-289
<u>Le Roux, Amanda &amp; Murray, Hanlie &amp; Olivier, Alwyn</u> <i>Analysis of children's argumentation while making sense of fractions</i>	1-290
<u>Lee, Sit Yuen</u> <i>Teachers' thinking on incorporating graphing calculators into mathematics teaching</i>	1-291

<u>Lin, Fou-Lai &amp; Yang, Kai-Lin</u> <i>Defining a rectangle under a social and practical setting by two seventh graders</i>	1-292
<u>Mackay, Irene F.</u> <i>A time of change</i>	1-293
<u>Mamede, Ema Paula</u> <i>The calculator's role in problem solving: a case study in a fourth grade classroom</i>	1-294
<u>Mamana-Downs, Joanna &amp; Downs, Martin</u> <i>Promoting students' awareness in applying bijections in enumeration tasks</i>	1-295
<u>Markovits, Zvia</u> <i>Have we done a good job? What do teachers think about their training to teach mathematics in elementary school?</i>	1-296
<u>Martins-Mourao, Antonio</u> <i>An integrated view of children's number understanding: A multi-component analysis from early counting to place value</i>	1-297
<u>Mevarech, Zemira R &amp; Kramarski, Bracha</u> <i>Metacognitive discourse in mathematics classrooms</i>	1-298
<u>Misailidou, Christina &amp; Williams, Julian</u> <i>Diagnostic teaching and ratio: The effect of pictorial representations on strategies</i>	1-299
<u>Mok, Ida Ah-Chee &amp; Tse, Betty Sui Wah</u> <i>Students' appreciation of 3-dimensional solids: A study in Hong Kong</i>	1-300
<u>Monteiro, Cecilia &amp; Serrazina, Lurdes &amp; Barros, Elsa</u> <i>Children's strategies to solve proportional problems in a real context</i>	1-301
<u>Moschkovich, Judit</u> <i>"I went by twos, he went by ones" Multiple views of graphs</i>	1-302
<u>Mukhopadhyay, Swapna &amp; Greer, Brian</u> <i>Six characters in search of an answer</i>	1-303
<u>Nason, Rod &amp; Woodruff, Earl &amp; Lesh, Richard</u> <i>Establishing and maintaining authentic mathematical activity in CSCL communities</i>	1-304

<u>Nasser, Lilian &amp; Tinoco, Lucia</u> <i>Argumentation and proofs in mathematical teaching</i>	1-305
<u>Ngoepe, Mapula</u> <i>Explanations by mathematics teachers: An analysis</i>	1-306
<u>Papadopoulos, Ioannis &amp; Dagdilelis, Vassilios</u> <i>Using computers for didactic activities on areas: a case study</i>	1-307
<u>Parzysz, Bernard &amp; Jore, Françoise</u> <i>What is geometry for French pre-service elementary school teachers?</i>	1-308
<u>Pehkonen, Erkki &amp; Merenluoto, Kaarina</u> <i>Teacher students' mathematical understanding from the viewpoint of conceptual change</i>	1-309
<u>Perivolakis, Antonis &amp; Koleza, Eugenia &amp; Skordoulis, Constantine &amp; Dellaportas, Dimitris</u> <i>The effect of the socio-cultural factors during an interdisciplinary approach of teaching mathematics &amp; technology</i>	1-310
<u>Perrusquia, Elvia &amp; Rojano, Teresa</u> <i>The role of representation devices in the conceptualization of change: A case study with 10 to 11-year old pupils</i>	1-311
<u>Pinel, Adrian</u> <i>Catechetics observed in mathematics classrooms</i>	1-312
<u>Price, Alison</u> <i>Analysis of young children's achievements in measuring 'time'</i>	1-313
<u>Rogalski, Janine &amp; Rogalski, Marc</u> <i>How do future mathematics teachers deal with different types of implications?</i>	1-314
<u>Sakonidis, Haralambos &amp; Bliss, J</u> <i>Mathematics teaching and learning practices in transition</i>	1-315
<u>Selva, Ana Coelho Vieira &amp; Da Rocha-Falcão, Jorge Tarcísio</u> <i>Understanding and using graphs: a didactic sequence for pre-school children</i>	1-316
<u>Shane, Ruth</u> <i>Supporting mathematical literacy for kindergarten children at-risk</i>	1-317

<u>Spinillo, Alina &amp; Lautert, Sintria</u>	1-318
<i>Representations and solving procedures in word division problems: Comparing formal and informal knowledge in children</i>	
<u>Squire, Sarah</u>	1-319
<i>Children's misunderstanding of an inverse relation</i>	
<u>Steward, Susan</u>	1-320
<i>Ability grouping, sex and social class - effects on attitude towards and confidence in mathematics</i>	
<u>Stupp, Jonathan</u>	1-321
<i>Equations as an example of a "procept"</i>	
<u>Swoboda, Ewa</u>	1-322
<i>Relationship: Signs--object-concept in the process of the creation of the concept of similar figures (case study)</i>	
<u>Tortora, Roberto &amp; Iannece, Donatella &amp; Nazzaro, Pasqualina</u>	1-323
<i>From naïve drawing to cartesian representation</i>	
<u>Tzekaki, Marianna</u>	1-324
<i>Introducing reasoning in early childhood</i>	
<u>Ursini, Sonia &amp; Sacristán, Ana Isabel</u>	1-325
<i>Challenges in incorporating new technologies to the mathematics classroom</i>	
<u>Vamvakoussi, Xanthi &amp; Vosniadou, Stella</u>	1-326
<i>What mental models do students use regarding the structure of the domain of rational numbers?</i>	
<u>Watanabe, Tad &amp; Ginshima, Fumi</u>	1-327
<i>Japanese children's understanding of 10 as a unit</i>	
<u>Wilson, Kirsty &amp; Briggs, Mary</u>	1-328
<i>Able and gifted: a case study of year 6 children</i>	
<u>Winbourne, Peter</u>	1-329
<i>Student teachers' experiences of becoming 'expert' within the practice of primary school mathematics teaching</i>	
<u>Yáñez, Gabriel</u>	1-330
<i>Some challenges of the use of computer simulations in probability teaching</i>	

## Poster Presentations

- Applebaum, Mark & Samovol, Peter 1-333  
*Logical errors of students in the solution of mathematical problems*
- Ashleigh, Glenda 1-334  
*Individual differences in cognition and affect and secondary school students' multiplicative knowledge in basic arithmetical problems*
- Attorps, Iris 1-335  
*Teachers' knowledge about the equation concept*
- Costa, Maria Conceição 1-336  
*Early experiences in dynamic visual reasoning in a computer environment*
- da Silva, Maria Solange & da Silva, Marco Antonio Costa 1-337  
*How does a teaching practice project influence the teacher-students' actions*
- De Bock, Dirk & van Dooren, Wim & Weyers, Dave & Verschaffel, Lieven 1-338  
*Do individual students consistently apply the same intuitive rule?*
- Fonseca, Lina 1-339  
*Preservice teachers, geometry and proof*
- Forrester, Ruth 1-340  
*Joined up thinking*
- Gazit, Avikam 1-341  
*Reflecting at the M.I.R.R.O.R. - teaching students with learning disabilities in mathematics*
- Gelfman, Emanuila & Kholodnaja, Marina 1-342  
*Forming cognitive schemes is one of the conditions of developing students' intellectual abilities*
- Hannula, Markku & Maijala, Hanna & Pehkonen, Erkki & Soro, Riitta 1-343  
*Three measures for confidence in mathematics*
- Hejný, Milan 1-344  
*Semantic types of an anchored addition and subtraction*
- Hoffmann, Ronit 1-345  
*Old tunes, new technology: how computers meet history in the math classroom*

<u>Hofmannová, Marie &amp; Novotná, Jarmila</u> <i>Implementation of content and language integrated learning (CLIL) in mathematics classroom</i>	1-346
<u>Hoyos, Verónica</u> <i>Focus on mediation of activity to developing classroom discourse</i>	1-347
<u>Kaldrimidou, Maria &amp; Pange, Jenny</u> <i>Computer-based mathematical games for preschool children</i>	1-348
<u>Karaca, Denizhan &amp; Gur, Hulya</u> <i>Elementary mathematics teachers' beliefs about the use of technological mathematics teaching in rural and urban areas</i>	1-349
<u>Kaur, Berinderjeet</u> <i>Supporting change through an in-service course: Activities to promote thinking in the mathematics classroom</i>	1-350
<u>Koirala, Hari</u> <i>Opening the mathematical horizon using open-ended tasks</i>	1-351
<u>Kontozisis, Dimitros &amp; Kaldrimidou, Maria</u> <i>A teaching experiment on how children understand the meaning of <math>\frac{1}{2}</math> fraction</i>	1-352
<u>Krainer, Konrad</u> <i>IMST<sup>2</sup> - A nation-wide initiative for upper secondary schools in Austria</i>	1-353
<u>Kratochvilova, Jana</u> <i>Difficulties arise with idea of complement</i>	1-354
<u>Kubínová, Marie</u> <i>Levels of understanding of letters in the word problem solving processes</i>	1-355
<u>Le Roux, Amanda &amp; Murray, Hanlie &amp; Olivier, Alwyn</u> <i>A web-based module on fractions for pre-service teachers</i>	1-356
<u>Linn, Marcia</u> <i>Wise design of mathematics software</i>	1-357
<u>Littler, Graham H</u> <i>Semantic types of number</i>	1-358

<u>Lucena, Ana Tiburtius &amp; Noss, Richard</u>	1-359
<i>The design of a computational environment to explore children's development of place value</i>	
<u>Mamede, Ema Paula</u>	1-360
<i>The calculator's role in problem solving: a case study in a fourth grade classroom</i>	
<u>Maranhão, Cristina &amp; Iglori, Sonia &amp; Soares, Elizabeth</u>	1-361
<i>Relations for fifth to eighth graders</i>	
<u>Millet, Shoshy &amp; Patkin, Dorit &amp; Ezer, Hanna</u>	1-362
<i>What is between Lafontein's quarter and the rational number quarter? or What is the difference between math justice and jungle justice</i>	
<u>Mooney, Claire &amp; Jones, Keith</u>	1-363
<i>Lost in space: primary trainee teachers' spatial subject knowledge and their classroom performance</i>	
<u>Presmeg, Norma &amp; Barret, Jeff</u>	1-364
<i>Concepts of operational symmetry in the thinking of four elementary school students</i>	
<u>Rogalski, Marc &amp; Rogalski, Janine</u>	1-365
<i>What do future mathematics teachers evaluating an implication when facing the case of premise falseness?</i>	
<u>Safuanov, Ildar &amp; Gusev, Valery</u>	1-366
<i>The structure of mathematical abilities</i>	
<u>Saló Nevado, Laia</u>	1-367
<i>The Euro at school</i>	
<u>Singer, Mihaela</u>	1-368
<i>New ways of developing mathematical abilities</i>	
<u>Soro, Riitta &amp; Pehkonen, Leila</u>	1-369
<i>Methodological considerations on gender stereotypes</i>	
<u>van Dooren, Wim &amp; De Bock, Dirk &amp; Hessels, An &amp; Janssens, Dirk &amp; Verschaffel, Lieven</u>	1-370
<i>Remedying secondary school students' illusion of linearity: A developmental research</i>	

Villella, Jose 1-371  
*How to read a mathematical textbook*

## **VOLUME 2**

### **Research Reports**

Acuña, Claudia 2-001  
*High school students' identification of equal slope and Y-intercept in different straight lines*

Afantiti Lamprianou, Thekla & Williams, Julian 2-009  
*A developmental scale for assessing probabilistic thinking and the tendency to use a representativeness heuristic*

Ainley, Janet & Pratt, David 2-017  
*Purpose and utility in pedagogic task design*

Akkoc, Hatice & Tall, David 2-025  
*The simplicity, complexity and complication of the function concept*

Alatorre, Silvia 2-033  
*A framework for the study of intuitive answers to ratio-comparison (probability) tasks*

Amit, Miriam & Fried, Michael N 2-041  
*Authority in the mathematics classroom and its influence on students' ability to reflect*

Anghileri, Julia 2-049  
*Scaffolding practices that enhance mathematics learning*

Barkai, Ruth & Tsamir, Pessia & Tirosh, Dina & Dreyfus, Tommy 2-057  
*Proving or refuting arithmetic claims: The case of elementary school teachers*

Baturo, Annette 2-065  
*Number sense, place value and the "odometer" principle in decimal numeration: Adding 1 tenth and 1 hundredth*

Belfort, Elizabeth & Guimarães, Luiz Carlos 2-073  
*The influence of subject matter on teachers' practices: Two case studies*

<u>Ben-Chaim, David</u> & Ilany, Bat-Sheva & Keret, Yaffa	2-081
<i>Mathematical and pedagogical knowledge of pre- and in-service elementary teachers before and after experience in proportional reasoning activities</i>	
<u>Bezerra, Francisco</u> & Magina, Sandra & Spinillo, Alina	2-089
<i>How to promote children's understanding of fractions? An exploratory study</i>	
<u>Bills, Christopher</u>	2-097
<i>Linguistic pointers in young childrens' descriptions of mental calculation</i>	
<u>Blanton, Maria</u> & Kaput, James J.	2-105
<i>Design principles for tasks that support algebraic thinking in elementary school classrooms</i>	
<u>Boaler, Jo</u>	2-113
<i>The development of disciplinary relationships: knowledge, practice and identity in mathematics classrooms</i>	
<u>Bobis, Janette</u> & <u>Aldridge, Sharne</u>	2-121
<i>Authentic learning contexts as an interface for theory and practice</i>	
<u>Boero, Paolo</u>	2-129
<i>Geometric signs and students' verbal reports: The case of the geometric model of sun shadows</i>	
<u>Bohl, Jeffrey</u> & <u>van Zoest, Laura</u>	2-137
<i>Learning through identity: A new unit of analysis for studying teacher development</i>	
<u>Borthwick, Alison</u>	2-145
<i>What do the pupils think? Pupils' perceptions of their mathematics lessons</i>	
<u>Boufi, Ada</u> & Skaftourou, Frosso	2-153
<i>Supporting students' reasoning with decimal numbers: A study of a classroom's mathematical development</i>	
<u>Bulgar, Sylvia</u> & Schörr, Roberta & Maher, Carolyn	2-161
<i>Teachers' questions and their role in helping students build an understanding of division of fractions</i>	

<u>Cabral, Tânia Christina Baptista</u> & Baldino, Roberto	2-169
<i>Lacanian psychoanalysis and pedagogical transfer: affect and cognition</i>	
<u>Cañadas, Consuelo</u> & Gómez, Pedro & Castro, Encarnación	2-177
<i>Didactical reflections about some proofs of the Pythagorean proposition</i>	
<u>Carreira, Susana</u> & Evans, Jeffrey & Lerman, Stephen & Morgan, Candia	2-185
<i>Mathematical thinking: Studying the notion of 'Transfer'</i>	
<u>Castro, Carlos de</u> & Segovia, Isodoro & Castro, Enrique	2-193
<i>An alternative model for the description of computational estimation strategies</i>	
<u>Castro, Enrique</u> & Castro, Carlos de & Segovia, Isodoro	2-201
<i>Influence of number type and analysis of errors in computational estimation tasks</i>	
<u>Cha, Shinwha</u> & Noss, Richard	2-209
<i>Designing to exploit dynamic-geometric intuitions to make sense of functions and graphs</i>

### VOLUME 3

#### Research Reports

- Glass, Barbara & Maher, Carolyn 3-001  
*Comparing representations and reasoning in young children with two-year college students*
- Gómez, Christina 3-009  
*The struggles of a community of mathematics teachers: Developing a community of practice*
- Gooya, Zahra & Nicol, Cynthia & Martin, Janet 3-017  
*Learning mathematics for teaching: Developing content knowledge and pedagogy in a mathematics course for intending teachers*
- Groves, Susie & Doig, Brian 3-025  
*Developing conceptual understanding: The role of the task in communities of mathematical inquiry*
- Grzegorcyk, Ivona & Stylianou, Despina 3-033  
*Exploration of an art venue for the learning of mathematics: The case of symmetry*
- Guzman, José & Kieran, Carolyn 3-041  
*The role of calculators in instrumental genesis: The case of Nicolas and factors and divisors*
- Hadas, Nurit & Hershkowitz, Rina 3-049  
*Activity analysis at the service of task design*
- Hadjidemetriou, Constantia & Williams, Julian 3-057  
*Teachers' pedagogical content knowledge: Graphs from a cognitivist to a situated perspective*
- Halai, Anjum 3-065  
*Developing taken as shared meanings in mathematics: Lessons from classrooms in Pakistan*
- Hannula, Markku 3-073  
*Goal regulation: Needs, beliefs and emotions*
- Heinze, Aiso 3-081  
*"...because a square is not a rectangle" - Students' knowledge of simple geometrical concepts when starting to learn proof*

<u>Heirdsfield, Ann</u>	3-089
<i>Flexible mental computation: What about accuracy?</i>	
<u>Hino, Keiko</u>	3-097
<i>Change in pupil's approach to proportion problems through classroom teaching: From the viewpoint of mediation by symbols</i>	
<u>Hong, Ye Yoon &amp; Thomas, Michael O.J.</u>	3-105
<i>Building Newton-Raphson concepts with CAS</i>	
<u>Howat, Hazel &amp; Gray, Eddie &amp; Pitta-Pantazi, Demetra</u>	3-113
<i>Have all the children benefited? A perspective on curriculum initiatives and low achievers</i>	
<u>Iannone, Paola &amp; Nardi, Elena</u>	3-121
<i>A group as a 'special set'? Implications of ignoring the role of the binary operation in the definition of a group</i>	
<u>Ilaria, Daniel</u>	3-129
<i>Growth in student mathematical understanding through precalculus student and teacher interactions</i>	
<u>Ishida, Junichi &amp; Sanji, Ayumi</u>	3-137
<i>Can poor students identify the good features of a demonstrated problem solving method and use it to solve a generalization problem?</i>	
<u>Jirotková, Darina &amp; Littler, Graham H.</u>	3-145
<i>Investigating cognitive and communicative processes through children's handling of solids</i>	
<u>Kaahwa, Janet</u>	3-153
<i>An investigation into my practice of training teachers in use of teaching aids in mathematics teaching and ways to improve it</i>	
<u>Kafoussi, Sonia</u>	3-161
<i>Learning opportunities in a kindergarten about the concept of probability</i>	
<u>Kaldrimidou, Maria</u>	3-169
<i>Teacher's role in the management of mathematical knowledge: An analysis of a problem solving process</i>	
<u>Kaput, James J &amp; Hegedus, Stephen J</u>	3-177
<i>Exploiting classroom connectivity by aggregating student constructions to create new learning opportunities</i>	

<u>Karsenty, Ronnie</u> & Vinner, Shlomo	3-185
<i>Functions, many years after school: What do adults remember?</i>	
<u>Kesianye, Sesutho K</u>	3-193
<i>From controlling to communicating: Innovation in Botswana's teacher preparation programme on integration of assessment and instruction</i>	
<u>Kidman, Gillian C</u>	3-201
<i>The accuracy of mathematical diagrams in curriculum materials</i>	
<u>Kidron, Ivy</u>	3-209
<i>Concept definition, concept image and the notion of infinite sum in old and new environments</i>	
<u>Koirala, Hari P</u>	3-217
<i>Facilitating student learning through math journals</i>	
<u>Kopelman, Evgeny</u>	3-225
<i>Misunderstanding of variables by students in an advanced course</i>	
<u>Kubínová, Marie</u> & <u>Novotná, Jarmila</u>	3-233
<i>Promoting students' meaningful learning in two different classroom environments</i>	
<u>Küchemann, Dietmar</u> & Hoyles, Celia	3-241
<i>Students' understanding of a logical implication and its converse</i>	
<u>Kutscher, Bilha</u> & Linchevski, Liora & Eisenman, Tammy	3-249
<i>From the Lotto game to subtracting two-digit numbers in first-graders</i>	
<u>Kyriakides, Leonidas</u> & Philippou, George & Charalambous, Charalambos	3-257
<i>Testing a developmental model of measuring problem solving skills based on schema theory</i>	
<u>Lamberg, Teruni</u> & Middleton, James	3-265
<i>The role of inscriptional practices in the development of mathematical ideas in a fifth grade classroom</i>	
<u>Lamprianou, Iasonas</u> & Afantiti Lamprianou, Thekla	3-273
<i>The nature of pupils' probabilistic thinking in primary schools in Cyprus</i>	

<u>Lavy, Ilana &amp; Bershadsky, Irina</u>	3-281
<i>"What if not?" Problem posing and spatial geometry - A case study</i>	
<u>Lawrie, Christine &amp; Pegg, John E. &amp; Gutiérrez, Angel</u>	3-289
<i>Unpacking student meaning of cross-sections: A frame for curriculum development</i>	
<u>Leu, Yuh-Chyn &amp; Wu, Chao-Jung</u>	3-297
<i>Mathematics pedagogical value system oriented towards the acquisition of knowledge in elementary school</i>	
<u>Liljedahl, Peter</u>	3-305
<i>Exploring the relationship between similar solution strategies and analogical reasoning</i>	
<u>Lin, Pi-Jen</u>	3-313
<i>Supporting teachers in building mathematical discourse communities by using research-based cases</i>	
<u>Magajna, Zlatan</u>	3-321
<i>Mathematical reasoning in context: What is the role of school mathematics?</i>	
<u>Mendick, Heather</u>	3-329
<i>'Why are we doing this?': A case study of motivational practices in mathematics classes</i>	
<u>Merenluoto, Kaarina &amp; Lehtinen, Erno</u>	3-337
<i>Certainty bias as an indicator of problems in conceptual change: the case of number line</i>	
<u>Milani, Raquel &amp; Baldino, Roberto</u>	3-345
<i>The theory of limits as an obstacle to infinitesimal analysis</i>	
<u>Miyakawa, Takeshi</u>	3-353
<i>Relation between proof and conception: The case of proof for the sum of two even numbers</i>	
<u>Monteiro, Carlos Eduardo Ferreira</u>	3-361
<i>Investigating the interpretation of economics graphs</i>	
<u>Moreira, Leonor</u>	3-369
<i>Mathematics education and critical consciousness</i>	

<u>Mourão, Ana Paula</u> <i>Quadratic function and imagery: Alice's case</i>	3-377
<u>Nabors, Wanda</u> <i>On the path to proportional reasoning</i>	3-385
<u>Neria, Dorit &amp; Amit, Miriam</u> <i>Gender and written mathematical communication</i>	3-393
<u>Nickerson, Susan D &amp; Sowder, Judith T</u> <i>What factors influence the formation of teachers' professional communities and why should we care?</i>	3-401
<u>Ninomiya, Hiro</u> <i>A study on the roles of "others" in learning: From the case of Characters Method, a new way to learn mathematics</i>	3-409
<u>Nisbet, Steven</u> <i>Representing numerical data: The influence of sample size</i>	3-417
<u>Nkhoma, Pentecost M</u> <i>What do successful black South African students consider enabled them to be successful</i>	3-425
