

TABLE OF CONTENTS

VOLUME 1

Table of Contents	1-iii
Introduction	1-xxxi
Welcome	1-xxxiii
The International Group for the Psychology of Mathematics Education	1-xxxv
Proceedings of previous PME conferences	1-xxxvii
The review process of PME29	1-xxxix
List of PME29 reviewers	1-xl
Index of presentations by research domains	1-xliii
List of authors	1-xlix

Plenary Lectures

Lin, Fou-Lai	1-3
<i>Modelling students' learning in argumentation and mathematics proof</i>	
Stacey, Kaye	1-19
<i>Travelling the road to expertise: A longitudinal study of learning</i>	
Sfard, Anna & Prusak, Anna	1-37
<i>Telling identities: The missing link between culture and learning mathematics</i>	
Reimann, Peter	1-53
<i>Co-constructing artefacts and knowledge in net-based teams: Implications for the design of collaborative learning environments</i>	

Plenary Panel

Jones, Graham (Panel coordinator)	1-71
<i>What do studies like PISA mean to the mathematics education community?</i>	
Shimizu Yoshinori	1-75
<i>From a profile to the scrutiny of student performance: Exploring the research possibilities offered by the international achievement studies</i>	
Neubrand, Michael	1-79
<i>The PISA-study: Challenge and impetus to research in mathematics education</i>	
Kieran, Carolyn	1-83
<i>Some results from the PISA 2003 international assessment of mathematics learning: What makes items difficult for students?</i>	
Williams, Julian	1-87
<i>The foundation and spectacle of [the leaning tower of] PISA</i>	

Research Forums

RF01 <i>The significance of task design in mathematics education: Examples from proportional reasoning</i>	1-93
Coordinators: Janet Ainley & Dave Pratt	
De Bock, Dirk & Van Dooren, Wim & Verschaffel, Lieven	1-97
<i>Not everything is proportional: Task design and small-scale experiment</i>	
Gravemeijer, Koen & van Galen, Frans & Keijzer, Ronald	1-103
<i>Designing instruction on proportional reasoning with average speed</i>	
Friedlander, Alex & Arcavi, Abraham	1-108
<i>Folding perimeters: Designer concerns and student solutions</i>	
Ainley, Janet & Pratt, Dave	1-114
<i>The dolls' house classroom</i>	

RF02	<i>Gesture and the construction of mathematical meaning</i>	1-123
Coordinators: Ferdinando Arzarello & Laurie Edwards		
Arzarello, F. & Ferrara, F. & Robutti, Ornella & Paola, D. & Sabena, C.	<i>Shaping a multi-dimensional analysis of signs</i>	1-127
Bartolini Bussi, Maria G. & Maschietto, Michela	<i>Working with artefacts: The potential of gestures as generalization devices</i>	1-131
Edwards, Laurie D.	<i>The role of gestures in mathematical discourse: Remembering and problem solving</i>	1-135
Ferrara, Francesca & Nemirovsky, Ricardo	<i>Connecting talk, gesture, and eye motion for the microanalysis of mathematics learning</i>	1-138
Radford, Luis	<i>Why do gestures matter? Gestures as semiotic means of objectification</i>	1-143
Williams, Julian	<i>Gestures, signs and mathematisation</i>	1-146
Kaput, James	<i>Building intellectual infrastructure to expose and understand ever-increasing complexity</i>	1-148
RF03	<i>A progression of early number concepts</i>	1-155
Coordinators: Kathleen Hart & Ann Gervasoni		
Gervasoni, Ann	<i>Using growth points to describe pathways for young children's number learning</i>	1-156
Hart, Kathleen	<i>Number attainment in Sri Lankan primary schools</i>	1-161
Pearn, Catherine	<i>Mathematics Recovery: Frameworks to assist students' construction of arithmetical knowledge</i>	1-165

RF04	<i>Theories Of Mathematics Education</i>	1-170
Coordinators: Lyn English & Bharath Sriraman		
Lester, Frank K. Jr.	<i>The place of theory in mathematics education research</i>	1-172
Lerman, Stephen	<i>Theories of mathematics education: A problem of plurality?</i>	1-179
Moreno Armella, Luis	<i>The articulation of symbol and mediation in mathematics education</i>	1-183
Pegg, John & Tall, David	<i>Using theory to advance our understandings of student cognitive development</i>	1-187
Lesh, Richard & English, Lyn	<i>Trends in the evolution of models and modeling perspectives on mathematical learning and problem solving</i>	1-192
Törner, Günter & Sriraman, Bharath	<i>Issues and tendencies in German mathematics-didactics: An epochal perspective</i>	1-197

Discussion Groups

DG01	<i>Mathematics and gender: Should the world still care?</i>	1-205
Coordinators: Helen Forgasz & Joanne Rossi Becker		
DG02	<i>Abstraction in mathematics learning</i>	1-206
Coordinators: Michael Mitchelmore & Paul White		
DG03	<i>Research by teachers, research with teachers</i>	1-207
Coordinators: Jarmila Novotná & Agatha Lebethe & Gershon Rosen & Vicki Zack		
DG04	<i>Thought and language in the context of mathematics education</i>	1-208
Coordinators: Cristina Frade & Stephen Lerman & Jorge Tarcísio da Rocha Falcão & Luciano Meira		

DG05	<i>Towards new perspectives and new methodologies for the use of technology in mathematics education</i>	1-209
	Coordinators: Bibi Lins & Victor Giraldo & Luiz Mariano Carvalho & Laurie Edwards	
DG06	<i>Indigenous communities and mathematics education: Research issues and findings</i>	1-210
	Coordinators: Annette Baturo & Miriam Amit & Hsiu-Fei Lee	
DG07	<i>Teacher change</i>	1-211
	Coordinators: Markku S. Hannula & Peter Sullivan	
DG08	<i>Embodiment in mathematics: Metaphors and gestures</i>	1-212
	Coordinators: Laurie D. Edwards & Chris Rasmussen & Ornella Robutti & Janete Bolite Frant	
DG09	<i>Developing algebra reasoning in the early grades (K-8)</i>	1-213
	Coordinators: Elizabeth Warren & Tom Cooper	

Working Sessions

WS01	<i>Teaching and learning mathematics in multilingual classrooms</i>	1-217
	Coordinators: Mamokgethi Setati & Richard Barwell & Anjum Halai	
WS02	<i>Examining theses</i>	1-218
	Coordinators: Kath Hart & Anne Berit Fuglestad	

Short Orals

Abdul Rahman, Roselainy & Mohammad Yusof, Yudariah & Mason, John H.	<i>Mathematical knowledge construction: Recognizing students' struggle</i>	1-221
Acuña, Claudia	<i>Figural interpretation of straight lines through identification, construction and description focussed on slope and y-intercept features</i>	1-222

Baharun, Sabariah & Mohammad Yusof, Yudariah & Ahmad, Tahir & Arshad, Khairil Annuar <i>Thinking mathematically: Personal journey in the modeling of a clinical waste incineration process</i>	1-223
Bazzini, Luciana & Bertazzoli, Luisa & Morselli, Francesca <i>The fruitful synergy of paper & pencil and Cabri géomètre: A case study</i>	1-224
Beckmann, Sybilla <i>Development of a rationale in a US text and in Singapore's school mathematics texts</i>	1-225
Borba, Rute Elizabete de Souza Rosa <i>How children solve division problems and deal with remainders</i>	1-226
Bower, Michelle L. W. <i>Student mathematical talk: A case study in algebra and physics</i>	1-227
Breen, Chris <i>Ethical considerations in a mathematics teacher education classroom</i>	1-228
Brown, Tony & Bradford, Krista <i>Ceci n'est pas un "circle"</i>	1-229
Bruder, Regina & Komorek, Evelyn & Schmitz, Bernhard <i>Development and evaluation of a concept for problem-solving and self-guided learning in maths lessons</i>	1-230
Calder, Nigel <i>Mathematical problem-solving in a spreadsheet environment: In what ways might student discourse influence understanding?</i>	1-231
Caswell, Rosemaree & Nisbet, Steven <i>The value of play in learning mathematics in the middle years of schooling</i>	1-232
Cedillo, Tenoch <i>The potential of CAS to promote changes in teachers' conceptions and practices</i>	1-233

Chang, Yu-Liang & Wu, Su-Chiao <i>Pre-service teachers' self-efficacy toward elementary mathematics and science</i>	1-234
Cretchley, Patricia <i>Students and software: Tales of anxiety, songs of support</i>	1-235
Cunningham, Robert F. & van der Sandt, Suriza <i>Composition and decomposition of 2-dimensional figures demonstrated by preservice teachers</i>	1-236
Davis, Sarah M. <i>What's in a name? Anonymity of input in next-generation classroom networks</i>	1-237
Dindyal, Jaguthsing <i>Students' use of different representations in problem solving at high school level</i>	1-238
Finnane, Maureen <i>Automatised errors: A hazard for students with mathematical learning difficulties</i>	1-239
Gooya, Zahra & Karamian, Azar <i>Teaching geometry in two secondary classrooms in Iran, using ethnomathematics approach</i>	1-240
Groves, Susie & Doig, Brian <i>Teaching strategies to support young children's mathematical explanations</i>	1-241
Hansen, Alice & Pratt, Dave <i>How do we provide tasks for children to explore the dynamic relationships between shapes?</i>	1-242
Hardy, Tansy <i>Participation, performance and stage fright: Keys to confident learning and teaching in mathematics?</i>	1-243
Herbert, Sandra & Pierce, Robyn <i>An emergent model for rate of change</i>	1-244
Holton, Derek & Linsell, Chris <i>The role of activities in teaching early algebra</i>	1-245

Izsák, Andrew	1-246
<i>Coordinated analyses of teacher and student knowledge engaged during fraction instruction</i>	
Jakubowski, Elizabeth	1-247
<i>Differences in learning geometry among high and low spatial ability preservice mathematics teachers</i>	
Kazima, Mercy	1-248
<i>Mathematical knowledge for teaching probability in secondary schools</i>	
Kesianye, Sesutho	1-249
<i>Student teachers' views on learning through interactive and reflective methods</i>	
Kim, In Kyung	1-250
<i>Low-achievement students' rationale about mathematics learning</i>	
Kim, NamGyun	1-251
<i>Characteristics of early elementary students' mathematical symbolizing processes</i>	
Knapp, Jessica & Oehrtman, Michael	1-252
<i>Temporal order in the formal limit definition</i>	
Koyama, Masataka	1-253
<i>Research on the process of understanding mathematics: Ways of finding the sum of the measure of interior angles in a convex polygon</i>	
Krupanandan, Daniel	1-254
<i>Mathematics: Coping with learner success or failure.</i>	
Kwon, MinSung & Pang, JeongSuk & Lee, Kyung Hwa	1-255
<i>An analysis of teacher-students interaction in Korean elementary mathematics classrooms</i>	
Kwon, Oh Nam & Ju, Mi-Kyung & Kim, So Youn	1-256
<i>Students' graphical understanding in an inquiry-oriented differential equation course: Implication for pre-service mathematics teacher education</i>	

Lamb, Martin & Malone, John	1-257
<i>Types of visual misperception in mathematics</i>	
Leung, King-man	1-258
<i>Developing students' high-order thinking skills through increasing student-student interaction in the primary classroom</i>	
Lin, Pi-Jen	1-259
<i>Supporting teachers on learning to teach fraction equivalence by providing research data of children's thinking</i>	
Lindén, Nora	1-260
<i>Pupils' tools for communicating meta-knowledge</i>	
Lins, Abigail F. (Bibi), & Araújo Jr, Carlos F. de. & Costa, Carlos H. de J. & Guazzelli, Iara R. B. & Bonici, Rosângela M. C.	1-261
<i>Mathematics education, culture and new technologies</i>	
Liu, Po-Hung	1-262
<i>Investigation of students' views of mathematics in a historical approach calculus course</i>	
Liu, Shiang-tung & Ho, Feng-chu	1-263
<i>Conjecture activities for comprehending statistics term through speculations on the functions of fictitious spectrometers</i>	
MacGregor, Mollie	1-264
<i>Turning mathematical processes into objects</i>	
Mashiach-Eizenberg, Michal & Lavy, Ilana	1-265
<i>The beneficial and pitfall role of the spoken language in the informal definition of statistical concepts</i>	
Misailidou, Christina	1-266
<i>A didactic proposal for supporting pupils' proportional reasoning</i>	
Na, GwiSoo	1-267
<i>An investigation on proofs education in Korea</i>	
Oikonomou, Andreas & Tzekaki, Marianna	1-268
<i>Improving spatial representations in early childhood</i>	

Papic, Marina	1-269
<i>The development of patterning in early childhood</i>	
Pinel, Adrian J. & Dawes, Maria & Plater, Carol	1-270
<i>The development and piloting of a six month pre-initial teacher training mathematics enhancement course</i>	
Pongboriboon, Yachai & Punturat, Sompong & Chaiyo, Anchalee	1-271
<i>Authentic assessment in mathematics classroom: A participatory action research</i>	
Reading, Chris & Wessels, Helena & Wessels, Dirk	1-272
<i>The candy task goes to South Africa: Reasoning about variation in a practical context</i>	
Rösken, Bettina & Törner, Günter	1-273
<i>Some characteristics of mental representations of the integral concept: An empirical study to reveal images and definitions</i>	
Ryan, Julie & McCrae, Barry	1-274
<i>Pre-service teachers' mathematics subject knowledge: Admissions testing and learning profiles</i>	
Sakonidis, Haralambos	1-275
<i>Mathematics teachers' pedagogical identities under construction: A study</i>	
Seah, Rebecca & Booker, George	1-276
<i>Middle school mathematics education and the development of multiplication conceptual knowledge</i>	
Shy, Haw-Yaw & Feng, Shu-Chen & Liang, Chorng-Huey	1-277
<i>A revisit on problem solving</i>	
Siemon, Dianne & Enilane, Fran & McCarthy, Jan	1-278
<i>Probing Indigenous students' understanding of Western mathematics</i>	
Slaten, Kelli M. & Berenson, Sarah B. & Droujkova, Maria & Tombes, Sue	1-279
<i>Assessing beginning pre-service teacher knowledge: An early intervention strategy</i>	

Sriraman, Bharath <i>The impediments to formulating generalizations</i>	1-280
Thomas, Noel & Hastings, Wendy & Dengate, Bob <i>Student numeracy: A study of the numeracy development of teaching undergraduates</i>	1-281
Tsai, Wen-Huan <i>Interaction between teaching norms and learning norms from professional community and classroom communities</i>	1-282
Tsamir, Pessia & Ovodenko, Regina <i>“Erroneous tasks”: Prospective teachers’ solutions and didactical views</i>	1-283
Tsao, Yea-Ling <i>Blind students’ perspective on learning the geometric concepts in Taiwan</i>	1-284
Tso, Tai-Yih <i>Mathematical modelling as learning activities</i>	1-285
Tzekaki, Marianna & Littler, Graham <i>Innovative teaching approaches in different countries</i>	1-286
Vale, Colleen <i>Equity and technology: Teachers’ voices</i>	1-287
van der Sandt, Suriza <i>The state and impact of geometry pre-service preparation: Possible lessons from South Africa</i>	1-288
Walls, Fiona <i>Examining task-driven pedagogies of mathematics</i>	1-289
Walshaw, Margaret & Siber, Elizabeth <i>Inclusive mathematics: catering for the ‘learning-difficulties’ student</i>	1-290
Warner, Linda & Anthony, Glenda <i>Children’s notation on early number computation</i>	1-291

Warner, Lisa B. & Schorr, Roberta Y. & Samuels, May L. & Gearhart, Darleen L. <i>Teacher behaviors and their contribution to the growth of mathematical understanding</i>	1-292
Webb, Lyn & Webb, Paul <i>Teachers' beliefs of the nature of mathematics: Effects on promotion of Mathematical Literacy</i>	1-293
Wu, Su-Chiao & Chang, Yu-Liang <i>Action research on integrating brain-based educational theory in mathematics teacher preparation program</i>	1-294
Yen, Fu-Ming & Chang, Ching-Kuch <i>Using writing to explore how junior high school gifted students construct model in problem solving.</i>	1-295
Yen, Ying-Hsiu & Shy, Haw-Yaw & Chen, Chun-Fang & Liang, Chorng-Huey & Feng, Shu-Chen <i>An alternative model on gifted education</i>	1-296
Yevdokimov, Oleksiy <i>Learning mathematical discovery in a classroom: Different forms, characteristics and perspectives. A case study</i>	1-297
Young-Loveridge, Jennifer M. & Taylor, Marilyn & Hawera, Ngarewa <i>Students' views about communicating mathematically with their peers and teachers</i>	1-298

Poster presentations

Andresen, Mette <i>Working with mathematical models in CAS</i>	1-301
Baggett, Patricia & Ehrenfeucht, Andrzej <i>A non-standard mathematics program for K-12 teachers</i>	1-302
Berry, Betsy (Sandra E.) <i>Supporting the development of middle school mathematics teachers' evolving models for the teaching of algebra</i>	1-303
Bispo, Regina & Ramalho, Glória <i>Evaluation of suggested problems in Portuguese mathematics textbooks</i>	1-304

Chen, Yen-Ting & Leou, Shian <i>The investigation of conceptual change and argumentation in mathematical learning</i>	1-305
Chung, Jing <i>Teaching time by picture books for children in mathematics class</i>	1-306
De Bock, Dirk & Van Dooren, Wim & Verschaffel, Lieven <i>The over-reliance on linearity: A study on its manifestations in popular press</i>	1-307
Droujkov, Dmitri & Droujkova, Maria <i>Software for the development of multiplicative reasoning</i>	1-308
Droujkova, Maria <i>Tables and young children's algebraic and multiplicative reasoning</i>	1-309
Fuglestad, Anne Berit <i>Students' choices of ICT tools and their reasons.</i>	1-310
Higgins, Joanna <i>Teacher orientations to equipment use in elementary mathematics classrooms</i>	1-311
Hino, Keiko <i>Process of change of teaching on ratio and proportion by making aware of a knowledge acquisition model: Case study</i>	1-312
Hsieh, Ju-Shan <i>Pre-service math teachers' beliefs in Taiwan</i>	1-313
Ilany, Bat-Sheva & Margolin, Bruria <i>A procedural model for the solution of word problems in mathematics</i>	1-314
Ji, EunJeung <i>The 5th-10th grade students' informal knowledge of sample and sampling</i>	1-315
Katsap, Ada <i>Fostering teachers' ethnomathematical learning and training: How done in fact and what can be learned about?</i>	1-316

Kishimoto, Tadayuki	1-317
<i>Students' misconception of negative numbers: Understanding of concrete, number line, and formal model</i>	
Kwon, Oh Nam & Park, Jungsook & Park, Jeehyun & Oh, Hyemi & Ju, Mi-Kyung	1-318
<i>The effects of mathematics program for girls based on feminist pedagogy</i>	
Larios Osorio, Víctor	1-319
<i>Argumentation and geometric proof construction on a dynamic geometry environment</i>	
Lautert, Sintria Labres & Spinillo, Alina Galvão	1-320
<i>What's wrong with this solution procedure? Asking children to identify incorrect solutions in division-with-remainder (DWR) problems</i>	
Lombard, Ana-Paula & Kühne, Cally & van den Heuvel-Panhuizen, Marja	1-321
<i>Interviewing foundation phase teachers to assess their knowledge about the development of children's early number strategies</i>	
Ma, Hsiu-Lan	1-322
<i>A study of developing practical reasoning</i>	
Misailidou, Christina	1-323
<i>Developing ideas: A case study on teaching 'ratio' in secondary school</i>	
Okamoto, Yukari & Moseley, Bryan & Ishida, Junichi	1-324
<i>Analyses of US and Japanese students' correct and incorrect responses: Case of rational numbers</i>	
Pang, JeongSuk	1-325
<i>Mathematical activities and connections in Korean elementary mathematics</i>	
Robson, Daphne	1-326
<i>Online instruction for equation solving</i>	

Selva, Ana Coelho Vieira & Borba, Rute Elizabete de Souza Rosa <i>Using the calculator to understand remainders of divisions and decimal numbers</i>	1-327
Stroup, Walter M. & Davis, Sarah M. <i>Generative activities and function-based algebra</i>	1-328
Tsao, Yea-Ling <i>Teaching statistics with constructivist- base learning method to describe student attitudes toward statistics</i>	1-329
Warner, Lisa B. <i>Student behaviors that contribute to the growth of mathematical understanding</i>	1-330
Wessels, Helena & Wessels, Dirk <i>Assessment of spatial tasks of Grade 4-6 students</i>	1-331
Widjaja, Wanty <i>Didactical analysis of learning activities on decimals for Indonesian pre-service teachers</i>	1-332
Yao, Ru-Fen <i>Workshop on designing “school-based” mathematics instructional modules</i>	1-333
Yoshida, Kaori <i>Children’s “everyday concepts of fractions” based on Vygostky’s theory: before and after fraction lessons</i>	1-334

VOLUME 2

- Adler, Jill & Davis, Zain & Kazima, Mercy & Parker, Diane & Webb, Lyn 2-1
Working with learners' mathematics: Exploring a key element of mathematical knowledge for teaching
- Afantiti-Lamprianou, Thekla & Williams, Julian S. & Lamprianou, Iasonas 2-9
A comparison between teachers' and pupils' tendency to use a representativeness heuristic
- Ainley, Janet G. & Bills, Liz & Wilson, Kirsty 2-17
Purposeful task design and the emergence of transparency
- Alatorre, Silvia & Figueras, Olimpia 2-25
A developmental model for proportional reasoning in ratio comparison tasks
- Alcock, Lara & Weber, Keith 2-33
Referential and syntactic approaches to proof: Case studies from a transition course
- Alexandrou-Leonidou, Vassiliki & Philippou, George N. 2-41
Teachers' beliefs about students' development of the pre-algebraic concept of equation
- Amato, Solange Amorim 2-49
Developing students' understanding of the concept of fractions as numbers
- Amit, Miriam & Fried, Michael N. 2-57
Multiple representations in 8th grade algebra lessons: Are learners really getting it?
- Anderson, Judy & Bobis, Janette 2-65
Reform-oriented teaching practices: A survey of primary school teachers
- Arzarello, Ferdinando & Ferrara, Francesca & Robutti, Ornella & Paola, Domingo 2-73
The genesis of signs by gestures. The case of Gustavo

Asghari, Amir H. & Tall, David <i>Students' experience of equivalence relations, a phenomenographic approach</i>	2-81
Aspinwall, Leslie & Shaw, Kenneth L. & Unal, Hasan <i>How series problems integrating geometric and arithmetic schemes influenced prospective secondary teachers pedagogical understanding</i>	2-89
Baber, Sikunder Ali & Dahl, Bettina <i>Dealing with learning in practice: Tools for managing the complexity of teaching and learning</i>	2-97
Baldino, Roberto R. & Cabral, Tania C. B. <i>Situations of psychological cognitive no-growth</i>	2-105
Ball, Lynda & Stacey, Kaye <i>Good CAS written records: Insight from teachers</i>	2-113
Banerjee, Rakhi & Subramaniam, K. <i>Developing procedure and structure sense of arithmetic expressions</i>	2-121
Bardini, Caroline & Radford, Luis & Sabena, Cristina <i>Struggling with variables, parameters, and indeterminate objects or how to go insane in mathematics</i>	2-129
Barnes, Mary <i>Exploring how power is enacted in small groups</i>	2-137
Barwell, Richard <i>A framework for the comparison of PME research into multilingual mathematics education in different sociolinguistic settings</i>	2-145
Berger, Margot <i>Vygotsky's theory of concept formation and mathematics education</i>	2-153
Beswick, Kim <i>Preservice teachers' understandings of relational and instrumental understanding</i>	2-161

Borba, Marcelo C.	2-169
<i>The transformation of mathematics in on-line courses</i>	
Brodie, Karin	2-177
<i>Using cognitive and situated perspectives to understand teacher interactions with learner errors</i>	
Brown, Jill P.	2-185
<i>Identification of affordances of a technology-rich teaching and learning environment (TRTLE)</i>	
Bulmer, Michael & Rolka, Katrin	2-193
<i>The “A4-project”: Statistical world views expressed through pictures</i>	
Callingham, Rosemary	2-201
<i>A whole-school approach to developing mental computation strategies</i>	
Cao, Zhongjun & Forgasz, Helen & Bishop, Alan	2-209
<i>A comparison of perceived parental influence on mathematics learning among students in China and Australia</i>	
Chan, Kah Yein & Mousley, Judith	2-217
<i>Using word problems in Malaysian mathematics education: Looking beneath the surface</i>	
Chapman, Olive	2-225
<i>Constructing pedagogical knowledge of problem solving: Preservice mathematics teachers</i>	
Charalambous, Charalambos Y. & Pitta-Pantazi, Demetra	2-233
<i>Revisiting a theoretical model on fractions: Implications for teaching and research</i>	
Chaviaris, Petros & Kafoussi, Sonia	2-241
<i>Students’ reflection on their sociomathematical small-group interaction: A case study</i>	
Chick, Helen L. & Baker, Monica K.	2-249
<i>Investigating teachers’ responses to student misconceptions</i>	

Clarke, David & Seah, Lay Hoon	2-257
<i>Studying the distribution of responsibility for the generation of knowledge in mathematics classrooms in Hong Kong, Melbourne, San Diego and Shanghai</i>	
Cooper, Tom J. & Baturo, Annette R. & Warren, Elizabeth	2-265
<i>Indigenous and non-Indigenous teaching relationships in three mathematics classrooms in remote Queensland</i>	
Cranfield, Ty Corvell & Kühne, Cally & Powell, Gary	2-273
<i>Exploring the strategies used by Grade 1 to 3 children through visual prompts, symbols and worded problems: A case for a learning pathway for number</i>	
Diezmann, Carmel	2-281
<i>Primary students' knowledge of the properties of spatially-oriented diagrams</i>	
Droujkova, Maria A. & Berenson, Sarah B. & Slaten, Kelli & Tombes, Sue	2-289
<i>A conceptual framework for studying teacher preparation: The Pirie-Kieren model, collective understanding, and metaphor</i>	
English, Lyn & Watters, James	2-297
<i>Mathematical modelling with 9-year-olds</i>	
Fernández, Maria L	2-305
<i>Exploring "Lesson Study" in teacher preparation</i>	
Fox, Jillian	2-313
<i>Child-initiated mathematical patterning in the pre-compulsory years</i>	
Frade, Cristina	2-321
<i>The tacit-explicit nature of students' knowledge: A case study on area measurement</i>	
Francisco, John M. & Maher, Carolyn A.	2-329
<i>Teachers as interns in informal mathematics research</i>	
Frempong, George	2-337
<i>Exploring excellence and equity within Canadian mathematics classrooms</i>	

VOLUME 3

Fuglestad, Anne Berit <i>Students' use of ICT tools: Choices and reasons</i>	3-1
Furinghetti, Fulvia & Morselli, Francesca & Paola, Domingo <i>Interaction of modalities in Cabri: A case study</i>	3-9
Gallardo, Aurora & Hernández, Abraham <i>The duality of zero in the transition from arithmetic to algebra</i>	3-17
Galligan, Linda <i>Conflicts in offshore learning environments of a university preparatory mathematics course</i>	3-25
Gervasoni, Ann <i>The diverse learning needs of young children who were selected for an intervention program</i>	3-33
Goodchild, Simon & Jaworski, Barbara <i>Using contradictions in a teaching and learning development project</i>	3-41
Goos, Marilyn <i>A sociocultural analysis of learning to teach</i>	3-49
Gordon, Sue & Nicholas, Jackie <i>Three case studies on the role of memorising in learning and teaching mathematics</i>	3-57
Gorgorió, Núria & Planas, Núria <i>Reconstructing norms</i>	3-65
Guidoni, Paolo & Iannece, Donatella & Tortora, Roberto <i>Forming teachers as resonance mediators</i>	3-73
Haja, Shajahan <i>Investigating the problem solving competency of pre service teachers in dynamic geometry environment</i>	3-81
Hannula, Markku S. & Kaasila, Raimo & Pehkonen, Erkki & Laine, Anu <i>Structure and typical profiles of elementary teacher students' view of mathematics</i>	3-89

Hansson, Örjan	3-97
<i>Preservice teachers' view on $y=x+5$ and $y=\pi x^2$ expressed through the utilization of concept maps: A study of the concept of function</i>	
Heinze, Aiso	3-105
<i>Mistake-handling activities in the mathematics classroom</i>	
Heirdsfield, Ann	3-113
<i>One teacher's role in promoting understanding in mental computation</i>	
Herbel-Eisenmann, Beth & Wagner, David	3-121
<i>In the middle of nowhere: How a textbook can position the mathematics learner</i>	
Hewitt, Dave	3-129
<i>Chinese whispers – algebra style: Grammatical, notational, mathematical and activity tensions</i>	
Higgins, Joanna	3-137
<i>Pedagogy of facilitation: How do we best help teachers of mathematics with new practices?</i>	
Hoch, Maureen & Dreyfus, Tommy	3-145
<i>Students' difficulties with applying a familiar formula in an unfamiliar context</i>	
Howard, Peter & Perry, Bob	3-153
<i>Learning mathematics: Perspectives of Australian Aboriginal children and their teachers</i>	
Huang, Rongjin	3-161
<i>Verification or proof: Justification of Pythagoras' theorem in Chinese mathematics classrooms</i>	
Huillet, Danielle	3-169
<i>Mozambican teachers' professional knowledge about limits of functions</i>	
Inglis, Matthew & Simpson, Adrian	3-177
<i>Heuristic biases in mathematical reasoning</i>	

Jones, Ian & Pratt, Dave <i>Three utilities for the equal sign</i>	3-185
Kieran, Carolyn & Saldanha, Luis <i>Computer algebra systems (CAS) as a tool for coaxing the emergence of reasoning about equivalence of algebraic expressions</i>	3-193
Kim, Dong Joong & Sfard, Anna & Ferrini-Mundy, Joan <i>Students' colloquial and mathematical discourses on infinity and limit</i>	3-201
Koirala, Hari P. <i>The effect of mathmagic on the algebraic knowledge and skills of low-performing high school students</i>	3-209
Kühne, Cally & van den Heuvel-Panhuizen, Marja & Ensor, Paula <i>Learning and teaching early number: Teachers' perceptions</i>	3-217
Kuntze, Sebastian & Reiss, Kristina <i>Situation-specific and generalized components of professional knowledge of mathematics teachers: Research on a video-based in-service teacher learning program</i>	3-225
Lavy, Ilana & Shriki, Atara <i>Assessing professional growth of pre-service teachers using comparison between theoretical and practical image of the 'good teacher'</i>	3-233
Lee, Kyung Hwa <i>Mathematically gifted students' geometrical reasoning and informal proof</i>	3-241
Leu, Yuh-Chyn & Wu, Chao-Jung <i>Investigation on an elementary teacher's mathematics pedagogical values through her approach to students' errors</i>	3-249
Lin, Yung-Chi & Chin, Erh-Tsung <i>How the calculator-assisted instruction enhances two fifth grade student' learning number sense in Taiwan</i>	3-257
Lowrie, Tom & Diezmann, Carmel <i>Fourth-grade students' performance on graphical languages in mathematics</i>	3-265

Makar, Katie & Canada, Dan <i>Preservice teachers' conceptions of variation</i>	3-273
Mamede, Ema & Nunes, Terezinha & Bryant, Peter <i>The equivalence and ordering of fractions in part-whole and quotient situations</i>	3-281
Manu, Sitaniselao Stan <i>Growth of mathematical understanding in a bilingual context: Analysis and implications</i>	3-289
Marcou, Andri & Philippou, George <i>Motivational beliefs, self-regulated learning and mathematical problem solving</i>	3-297
Martin, Lyndon & LaCroix, Lionel & Fownes, Lynda <i>Fractions in the workplace: Folding back and the growth of mathematical understanding</i>	3-305
Maschietto, Michela & Bartolini Bussi, Maria G. <i>Meaning construction through semiotic means: The case of the visual pyramid</i>	3-313
Mousoulides, Nikos & Philippou, George <i>Students' motivational beliefs, self-regulation strategies and mathematics achievement</i>	3-321
Moutsios-Rentzos, Andreas & Simpson, Adrian <i>The transition to postgraduate study in mathematics: A thinking styles perspective</i>	3-329

VOLUME 4

- Mulligan, Joanne & Mitchelmore, Michael & Prescott, Anne 4-1
Case studies of children's development of structure in early mathematics: A two-year longitudinal study
- Nemirovsky, Ricardo & Rasmussen, Chris 4-9
A case study of how kinesthetic experiences can participate in and transfer to work with equations
- Norton, Stephen 4-17
The construction of proportional reasoning
- Olson, Jo Clay & Kirtley, Karmen 4-25
The transition of a secondary mathematics teacher: From a reform listener into a believer
- Owens, Kay 4-33
Substantive communication of space mathematics in upper primary school
- Pang, JeongSuk 4-41
Transforming Korean elementary mathematics classrooms to student-centered instruction
- Pegg, John & Graham, Lorraine & Bellert, Anne 4-49
The effect of improved automaticity and retrieval of basic number skills on persistently low-achieving students
- Peled, Irit & Bassan-Cincinatus, Ronit 4-57
Degrees of freedom in modeling: Taking certainty out of proportion
- Perry, Bob & Dockett, Sue 4-65
"I know that you don't have to work hard": Mathematics learning in the first year of primary school
- Philippou, George & Charalambous, Charalambos Y. 4-73
Disentangling mentors' role in the development of prospective teachers' efficacy beliefs in teaching mathematics
- Pierce, Robyn 4-81
Linear functions and a triple influence of teaching on the development of students' algebraic expectation

Pinel, Adrian J. <i>Engaging the learner's voice? Catechetics and oral involvement in reform strategy lessons</i>	4-89
Prescott, Anne & Mitchelmore, Michael <i>Teaching projectile motion to eliminate misconceptions</i>	4-97
Presmeg, Norma & Nenduradu, Rajeev <i>An investigation of a preservice teacher's use of representations in solving algebraic problems involving exponential relationships.</i>	4-105
Radford, Luis & Bardini, Caroline & Sabena, Cristina & Diallo, Pounthioun & Simbagoye, Athanase <i>On embodiment, artifacts, and signs: A semiotic-cultural perspective on mathematical thinking</i>	4-113
Rossi Becker, Joanne & Rivera, Ferdinand <i>Generalization strategies of beginning high school algebra students</i>	4-121
Sabena, Cristina & Radford, Luis & Bardini, Caroline <i>Synchronizing gestures, words and actions in pattern generalizations</i>	4-129
Schorr, Roberta Y. & Amit, Miriam <i>Analyzing student modeling cycles in the context of a 'real world' problem</i>	4-137
Seah, Wee Tiong <i>Negotiating about perceived value differences in mathematics teaching: The case of immigrant teachers in Australia</i>	4-145
Sekiguchi, Yasuhiro <i>Development of mathematical norms in an eighth-grade Japanese classroom</i>	4-153
Selva, Ana Coelho Vieira & da Rocha Falcão, Jorge Tarcísio & Nunes, Terezinha <i>Solving additive problems at pre-elementary school level with the support of graphical representation</i>	4-161

Sethole, Godfrey	4-169
<i>From the everyday, through the authentic, to mathematics: Reflecting on the process of teaching mathematics through the everyday</i>	
Sharma, Sashi	4-177
<i>Personal experiences and beliefs in early probabilistic reasoning: Implications for research</i>	
Shriki, Atara & Lavy, Ilana	4-185
<i>Assimilating innovative learning/teaching approaches into teacher education: Why is it so difficult?</i>	
Siswono, Tatag Yuli Eko	4-193
<i>Student thinking strategies in reconstructing theorems</i>	
Son, Ji-Won	4-201
<i>A comparison of how textbooks teach multiplication of fractions and division of fractions in Korea and in U.S.</i>	
Southwell, Beth & Penglase, Marina	4-209
<i>Mathematical knowledge of pre-service primary teachers</i>	
Steinle, Vicki & Stacey, Kaye	4-217
<i>Analysing longitudinal data on students' decimal understanding using relative risk and odds ratios</i>	
Steinhorsdottir, Olof Bjorg	4-225
<i>Girls journey toward proportional reasoning</i>	
Stewart, Sepideh & Thomas, Michael O. J.	4-233
<i>University student perceptions of CAS use in mathematics learning</i>	
Stylianides, Andreas J. & Stylianides, Gabriel J. & Philippou, George	4-241
<i>Prospective teachers' understanding of proof: What if the truth set of an open sentence is broader than that covered by the proof?</i>	
Sullivan, Peter & Zevenbergen, Robyn & Mousley, Judy	4-249
<i>Planning and teaching mathematics lessons as a dynamic, interactive process</i>	

Thomas, Michael O. J. & Hong, Ye Yoon <i>Teacher factors in integration of graphic calculators into mathematics learning</i>	4-257
Van Dooren, Wim & De Bock, Dirk & Janssens, Dirk & Verschaffel, Lieven <i>Students' overreliance on linearity: An effect of school-like word problems?</i>	4-265
Verhoef, N. C. & Broekman, H. G. B. <i>A process of abstraction by representations of concepts</i>	4-273
